PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on experience building RESTful web applications using Java, Spring Boot, MySQL, HTML, CSS, JavaScript, and Python. Developed AI-powered and database-driven applications with secure authentication, API integration, and responsive user interfaces. Strong foundation in Data Structures, OOP, DBMS, Operating Systems, and Computer Networks. Passionate about designing scalable backend systems and continuously learning modern software development practices.

TECHNICAL SKILLS

Languages	Java • Python • SQL • JavaScript
Backend	Core Java • Spring Boot • Spring Data JPA • Spring MVC • REST APIs • JWT Authentication • Flask • JDBC • Maven • Collections Framework
Frontend	HTML5 • CSS3 • JavaScript (ES6)
Database	MySQL • SQLite • CRUD Operations • SQL Indexing
AI / ML	TensorFlow • CNN (MobileNetV2) • Google Gemini API
Tools	Git • GitHub • Postman • VS Code • JSON • API Testing
Concepts	OOP • MVC Architecture • SDLC • Agile • Data Structures & Algorithms • Object-Oriented Design • Debugging

EDUCATION

B.Sc Computer Science — PSGR Krishnammal College for Women, Coimbatore | 2024 – 2027 (Pursuing)

Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP, Software Engineering

PROJECTS

AI Pet Assistant System [Completed]

Python • Flask • TensorFlow • CNN (MobileNetV2) • Google Gemini API • SQLite • SQLAlchemy • REST API

- Developed an AI-powered pet healthcare web application using Flask, TensorFlow, SQLite, and Google Gemini API for disease prediction and intelligent health assistance across 3 diagnostic categories.
- Integrated Google Gemini API for conversational health Q&A; designed normalised SQLite schema with SQLAlchemy ORM covering 5 core modules to improve data retrieval performance.
- Designed RESTful backend services with Flask Blueprints, structured exception handling, and modular architecture for scalable application development.

TruthLoom — Career Guidance Platform [In Progress - 75%]

Java • Spring Boot • MySQL • Spring Data JPA • REST API • HTML5 • CSS3 • JavaScript • MVC Architecture

- Built a full-stack career guidance platform using Spring Boot and MySQL supporting 10+ career domains with dynamic learning-path and skill-roadmap delivery.
- Designed RESTful API endpoints with Spring Data JPA for managing career domains, learning roadmaps, and user data, reducing data-retrieval overhead.
- Implemented responsive frontend following MVC architecture and Git-based Agile development practices across iterative sprint cycles.

Todo List REST API [Completed]

Java • Spring Boot • MySQL • JWT Authentication • Spring Data JPA

- Developed a secure REST API supporting CRUD operations with JWT stateless authentication and role-based authorisation using Spring Boot and Spring Data JPA.
- Improved database performance using pagination and optimised SQL indexing for MySQL query execution.

Task Tracker CLI [Completed]

Java • JSON • File I/O • OOP

- Built a Java console-based task management system implementing full CRUD operations, a 3-state task lifecycle, object-oriented programming principles, and JSON-based file persistence.

ACHIEVEMENTS

- Solved 136+ coding problems on LeetCode and HackerRank covering Java, SQL, Data Structures, and Algorithms — targeting 200+ challenges before placement season.
- Developed four academic and personal software projects using Java, Spring Boot, Flask, REST APIs, MySQL, and AI technologies.

CERTIFICATIONS

- Java Programming
- SQL & Database Management
- Python for Data Science
- Web Development (HTML, CSS, JavaScript)
